

Year 2 Home Learning Spring 2

Please see below the home learning for Spring 2, the aim is for at least one of these projects to be completed and presented to the class. This term's home learning is a consolidation of last term's learning in school. You have already learnt about these areas so should be able to show off what you've already learnt. The deadline for these to be in school is Thursday 3rd April 2025.

Remember you should also be reading to an adult at least five times a week too and recording this in your reading diary.

Maths

Our main themes are continuing with our work on fractions and revisiting place value with addition and subtraction. You could create a poster showing how different shapes can be split into halves or quarters. Could you create a poster to show different ways numbers can be represented?

PSHE

Our learning is based around the theme Staying Healthy with a focus on brushing teeth. Can you write a set of instructions explaining how to brush your teeth properly for a younger child. You could draw pictures to help explain the steps.

English

For our new text 'Big Bear Little Brother' make a Polar Bear animal puppet using materials you have at home (paper plates, card, paper etc). Here are some examples of what you could create.

Science

We are starting our materials topic. For your homework investigate materials that you might find around your home. Can you think of words to describe the materials. Can you test which ones are strongest? Make a report explaining your results.
