

Year 3 Home Learning Autumn 2

Our Year 3 weekly home learning expectations are:

Read your school reading book five times per week.

Develop your times tables fluency using Times Tables Rockstars three times a week.

Learn your spellings every week and complete any additional spelling tasks sent home.

You are also expected to complete at least one of these projects which you will bring in to present to the class.

The deadline for these to be in school is Monday 16th December 2024.

Computing

Create a stop motion animation. You can do this by downloading an app (there are many free stop motion apps available).

Use plasticine, Blu-Tac or even Lego figures to help tell a short story within your animation.

English

Create your own 'Giant' adventure story. What setting will you choose? Will your giant be kind like the BFG? Or will they be evil? Think carefully about your beginning, middle and end. Try to use descriptive vocabulary to really help your classmates picture your story!

Geography

Find out about a famous volcanic eruption and create a fact file about it. You could write about: Mount Etna, Mount St. Helens or Krakatoa.

In your fact file include the following information:

- Where is it located?
- When did it last erupt?
- What was the effect of the volcanic eruption?

You could always draw or print off pictures of the volcano as well.

Design & Technology

Design and bake a new healthy snack. Make sure to take photographs of the finished product. Evaluate your creation – Was it as delicious as you hoped? What would you do to improve it next time?
