

Year 5 Home Learning Summer 1

Our Year 5 weekly home learning expectations are: -

Read a reading book at least five times per week.
Develop your times tables fluency using Times Table Rockstars.
Learn your spellings each week by logging on to Spelling Shed.

**You are also expected to complete at least one of the projects below which you will bring in to present to the class.
The deadline for these to be in school is Monday 19th May 2025.**

English

Free write! Write a story about any topic you would like.
Make sure to have a clear: beginning, dilemma, resolution, ending.

Make sure you include the Year 5 techniques such as:
relative clauses, sentence structures, expanded noun phrases and upscaled vocabulary.

History

Carry out some research and create either a poster or PowerPoint about World War 2.

Maths

Create a game to help a peer with division. This could include quick fire questions, worded problems and formal methods. Remember you are trying to help somebody learn this so you need to include examples. Could you include resources for them to use?

PE

Design your own obstacle course to improve someone's agility (ability to move and change direction quickly). You need to think of what pieces of equipment would be needed, which age range it is suitable for and how you would see if their agility has improved. We could try some of these as warm ups in our PE lessons!
